Formerly Yale Associates Gallery Bulletin

# Suggestions for the Use of this Index

## Arrangement

Authors and subjects are arranged in one alphabetical file. Under authors and subjects, titles are filed by the first word, initial articles being disregarded. Under personal names titles *by* an author precede those *about* him. Subdivisions of subjects are arranged alphabetically or chronologically under the subject, country subdivisions following the form subdivisions.

## Collation

Following the title are noted the kind of illustrations which accompany the article, (in abbreviated form) and also any bibliographies or bibliographical footnotes of importance. Only that collation which pertains to the heading under which an article is listed is given in that entry. For example, under an author's name, the only items given are portraits and bibliography unless the author is the illustrator, while under the subject is given plates, plans, etc., but not the portrait of the author.

## Exhibitions

An exhibition of an individual artist is indexed under the artist's name whenever biographical or critical information is given.

## Illustrations

Titles of works of art (up to ten) accompanying the text of an article are listed in a note unless they appear in the title of the article or are not descriptive; in this case the number is given. Individual works by an artist, without text, are arranged by titles alphabetically under the subdivision Reproductions under the name of the artist. When the same title appears in more than one periodical, entries are combined under one title, the preference being given to the English form, or to the language of the artists.

## References

*See* references have been made from various forms of personal names and subject headings to authorized forms. *See also* references are made from subjects to related subjects.
